DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25, drawn to Computer Network Managing, classified in class 709, subclass 223.
- II. Claims 26-37, drawn to GUI for Onscreen Network Hierarchy/Onscreen Roadmap, classified in class 715, subclass 855.
- III. Claims 38-53, drawn to GUI for Network Managing and Monitoring, classified in class 715, subclass 736.

The inventions are distinct, each from the other because of the following reasons:

Invention Group I, Group II and Group III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group II has separate utility such as Graphical User Interface for Onscreen Network Hierarchy and Onscreen network roadmaps and Group It would have been obvious to one having ordinary skill in the art at the time the invention was made to have incorporated the has separate utility such as a Graphical User Interface for Network Managing and Monitoring. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2141

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
